Cannabis and Marijuana?

The difference between these two words is just that, a difference between words. There is no real evidence that there are any physical or biological differences between cannabis and marijuana

Object: A different way of providing clinical, medical and legal information to inform and educate particularly people experiencing mental illness, their friends, carers and relatives about use of an illicit drug

While the presentation does provide information about marijuana the purpose is to demonstrate a different format for providing health information.

If using this format you can add or subtract any information about the substance itself.
