

## ALCOHOL & OTHER DRUG TRAINING PROGRAM

### **Workforce Development - Alcohol & Other Drug Counselling Training Program**

Cyrenian House, through funding made available through WAPHA, is delivering a free **AOD Counselling Training Program.**

The program aims to offer participants who work in non AOD Community services, an intensive training package with the goal of developing core skills, knowledge and confidence for workers to support their consumers to treat their AOD issues effectively and holistically.

The participants will become the 'AOD champions' for their agency and can offer support to other workers as well as expanding the capacity of care in their agency. Upon completion, the participants will be better equipped to support, assess, treat and refer their consumers to suitable services, as well as develop networks and working relationships with others to facilitate treatment pathways for consumers.

**The training will run one day per week from January 17th to February 21st, 2019.**

Following the training, participants will be offered a one-week placement across Cyrenian House sites. Cyrenian House will provide ongoing clinical supervision, guidance and support to all trainees as they return to their workforce to support their ongoing development of working with AOD issues.

### **How do I register?**

If you are interested in participating in this training, please refer to our website [www.cyrenianhouse.com](http://www.cyrenianhouse.com) to download the registration form.
