

Help Us Shift Perspectives

WANADA will proudly host the 2020 WA alcohol and other drug conference, ***Shifting Perspective – Alcohol and other drugs: everybody's story*** at The Westin from 8 – 9 October 2020.

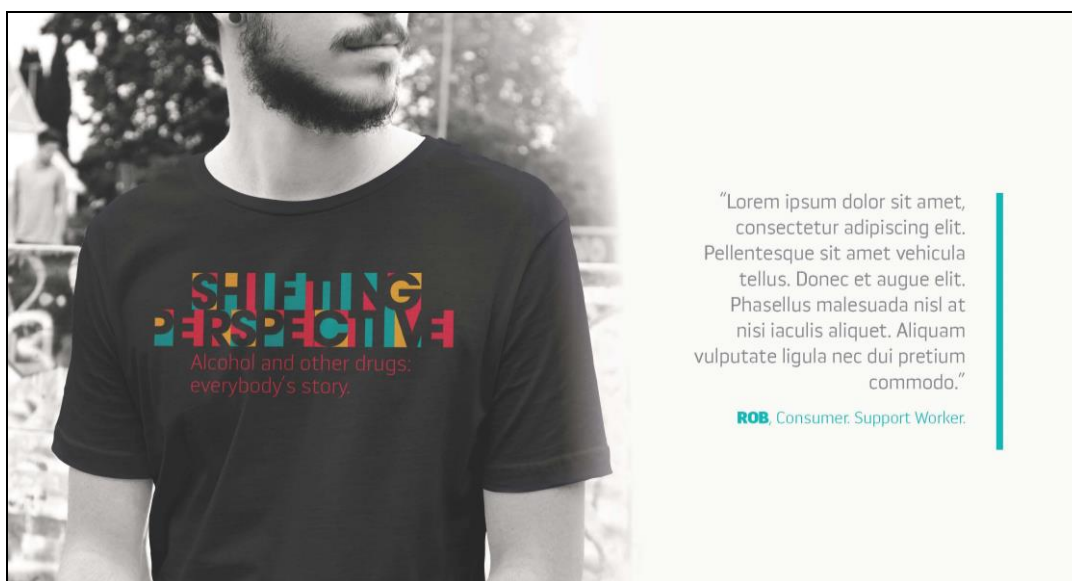

The conference will host international, national and local speakers presenting on alcohol and other drugs in law reform, health reform and co-occurring issues such as domestic and family violence, homelessness, blood borne viruses and mental health.

Contribute Your Voice – Share your Perspective

Alcohol and other drug use is a health and social issue, however public narratives around substance use are often punitive and stigmatising (for consumers, family members and sector workers).

To help inform a shift in this perspective we ask you to contribute to a shared voice, demonstrating that issues associated with alcohol and other drug use are everybody's story.

Your contribution

- Appear in a photograph. This can be non-identifying if preferred.
- Provide a short, written response (50-100 words) to the questions:
 - *How can a shift in perspective on alcohol and other drug use reduce harm in our communities?*
 - *If it applies, what contributed to your shift in perspective?*

Images and copy may be used in the following platforms:

- Conference marketing requirements including:
 - Sponsorship proposal
 - Conference website
 - Conference social media posts
 - Conference program

Copy only may be used in media releases and ongoing advocacy.

The more perspectives we can share, the more collective power we will have to shift the narrative around alcohol and other drug use.

To volunteer, discuss our request, or for a talent release form, please contact the conference coordinator:
